AJAY KUMAR

+1-667-369-8594 | akumar10@umbc.edu | LinkedIn | GitHub

SKILLS & CERTIFICATIONS

Languages: Python, C/C++, SQL, JavaScript, HTML/CSS, R
Data Analysis & Visualization: Excel, Tableau, Power BI, Matplotlib, Seaborn, pandas, NumPy, Matplotlib
Developer Tools: Git, Docker, Google Cloud Platform, VS Code, Eclipse, Anaconda, AWS (Certified)
Others: Agile, JIRA, Freshdesk, ServiceNow
Analytics & Data: Python (pandas, scikit-learn), SQL, Tableau, Power BI, Excel
Modeling & Methods: Customer segmentation, Predictive modeling, Data validation & standardization, Statistical analysis

PROFESSIONAL EXPERIENCE

Implementation Engineer - Pathlock Inc., India | Jul 2021 - May 2024
Analyzed large-scale enterprise IAM/IDAM datasets to identify access risk patterns, anomalies, and operational trends supporting audit and compliance decisions.
Designed and optimized SQL-based analytical models and stored procedures to generate standardized datasets and automated Segregation of Duties and access-risk reports.
Performed data cleaning, validation, and reconciliation to ensure accuracy and consistency across analytical outputs and dashboards.
Built Tableau dashboards and KPI reports on access risk and entitlement metrics, improving stakeholder visibility and reducing manual analysis by 25-30%.
Conducted exploratory data analysis on user access, role assignments, and entitlement changes to uncover trends and translate findings into actionable insights.
Translated business and audit requirements into structured analytical use cases by working with IAM/IDAM data from Workday, Active Directory, and ERP systems.
Conducted ad hoc analyses and POC reporting using access logs and entitlement data to support client discussions, audit readiness, and executive reporting.

Front-End Web Developer Intern - Pixelstat Pvt. Ltd., India | May 2019 - Jul 2019
Contributed and built responsive and dynamic web page for LMS system to access e-learning material & attendance (using RESTful API, CSS, JavaScript, React JS) for 5k+ users.

PROJECTS

Consumer Analytics Platform with Natural Language Querying (Fraud Detection) Sep2023 - Present
Built an end-to-end data analytics and business intelligence solution enabling natural-language queries to be converted into SQL for structured consumer data analysis.
Performed data mining, cleaning, validation, and exploratory data analysis (EDA) to identify trends in consumer spending, frequency, and temporal behavior.
Applied feature engineering and statistical analysis to prepare datasets for predictive modeling and insight generation.
Trained and evaluated machine learning classification models (Logistic Regression, Random Forest, Gradient Boosting) using standard performance metrics.
Developed automated reports, visual analytics, and dashboards to communicate KPIs and insights to non-technical stakeholders.
Implemented a Generative AI–based NL2SQL pipeline and deployed an interactive application to support real-time querying and business decision-making.

EDUCATION

University of Maryland, Baltimore County - Master's in data science (GPA: 3.8/4) | Aug 2024 - May 2026
MIT Academy of Engineering, Pune - B.Tech in Computer Science | May 2017 - June 2021
